

How the YMCA of Greater Williamson Successfully Went Paperless

In the span of a year, the YMCA of Greater Williamson County, one of nation’s largest YMCA, enhanced their before/after school, camps and childcare programs by making it paperless, mobile and quicker.

“Our parents LOVE the notification they get when their child is checked-in or checked-out. Plus attendance reports are at our fingertips. WIN-WIN!”

Dustin Forsythe
Technology Director
YMCA Greater
Williamson County

Going paperless is good for everyone.

Dustin Forsythe and his team’s goal was to not only save paper (and they used to print a lot of copies for roster etc.), but also to enhance the experience of the parents and make it easy for his counselors and administrators. Working hand in hand with KidKiosk team, the YMCA of Greater Williamson County developed a program that addressed their concerns and also helped with reporting and compliance.

“We used to print these rosters every week for all of our 70 sites. The paper and printing budget was through the roof”, Dustin explained. “Just the savings on paper has been able to pay for KidKiosk. The staff has picked up on KidKiosk very easily.”, he added.

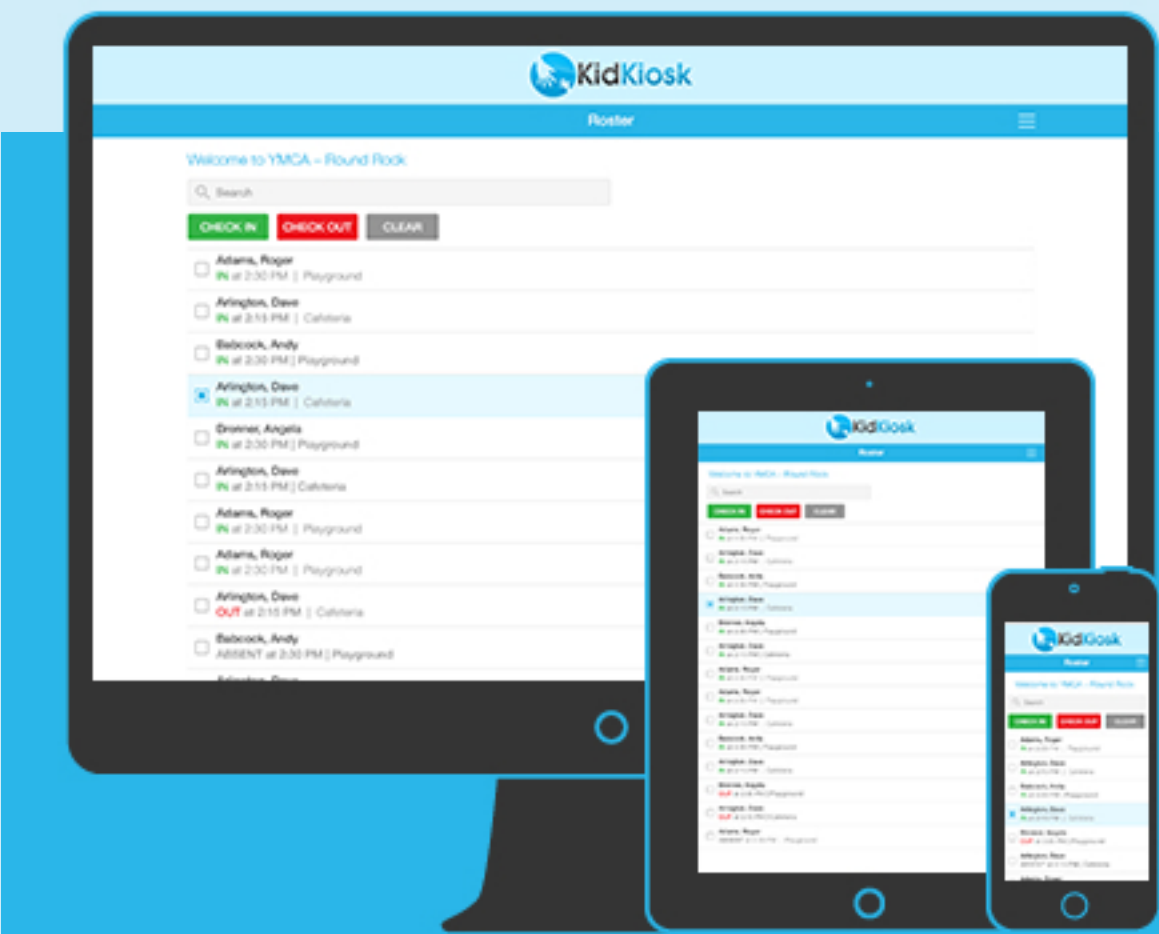

KidKiosk not only assigns unique and secure PINs to parents but also captures their electronic signatures. Parents are notified when their child has been checked in or picked up. Staff can run reports in a matter of seconds and export it to MS Excel or PDF as needed.

YMCA of Greater Williamson County plans on implementing a similar product for their ChildWatch program in 2017.

“ We have been 95% paperless this year. Your attendance does not get lost and you have all your attendance archived for several years ”

KEY FACTS

- ★ 5000 students
- ★ 70 sites
- ★ 150 staff members
- ★ Over 10,000 sheets of paper saved!
